

Chapter 1.4 — Use Categories

Background: Chapter 1.4 is intended to be used in conjunction with the land use standards in Article 2. For example, the tables in Article 2 summarizing permitted uses for each zone contain only general land use categories. Chapter 1.4 provides specific examples of uses that fall under each general category. By providing examples of specific uses, and not an exhaustive list, the city has flexibility in determining similar uses, which should be helpful as community values, technology, and consumer needs change.

Introduction to the Use Categories

1.4.010 Purpose. This Chapter classifies land uses and activities into use categories on the basis of common functional, product, or physical characteristics, as follows:

- A. **Categorization.** Uses are assigned to the category whose description most closely describes the nature of the primary use. The "Characteristics" subsection of each use category describes the characteristics of each use category. Developments may have more than one primary use. Developments may also have one or more accessory uses.
- B. **Interpretation.** When a use's category is not clearly identifiable, the Planning Official, through a Type I procedure, determines the applicable use category. The following is considered to determine what use category the use is in, and whether the activities constitute primary uses or accessory uses:
 - The description of the activity(ies) in relationship to the characteristics of each use category;
 - The relative amount of site or floor space and equipment devoted to the activity;
 - Relative amounts of sales from each activity;
 - The customer type for each activity;
 - The relative number of employees in each activity;
 - Hours of operation;
 - Building and site arrangement;
 - Vehicles used with the activity;
 - The relative number of vehicle trips generated by the activity;
 - Signs;
 - How the use advertises itself; and
 - Whether the activity would function independently of the other activities on the site.
- C. **Developments with multiple primary uses.** When all the primary uses of a development fall within one use category, then the development is assigned to that use category. For example, a development that contains a retail bakery and a cafe would be classified in the Retail Sales and Service category because all the primary uses are in that category. When the primary uses of a development fall within different use categories, each primary use is classified in the applicable category and is subject to the regulations for that category.

- D. **Accessory uses.** Accessory uses are allowed by right in conjunction with the use unless stated otherwise in the regulations. Also, unless otherwise stated, they are subject to the same regulations as the primary use. Typical accessory uses are listed as examples with the categories.
- E. **Use of examples.** The "Examples" subsection of each use category provides a list of examples of uses that are included in the use category. The names of uses on the lists are generic. They are based on the common meaning of the terms and not on what a specific use may call itself. For example, a use whose business name is "Wholesale Liquidation" but that sells mostly to consumers would be included in the Retail Sales and Service category rather than the Wholesale Sales category. This is because the actual activity on the site matches the description of the Retail Sales and Service category.
- F. **Exceptions.** The "Exceptions" subsection of each use category provides a list of examples of uses that are specifically excluded (not permitted) under that particular use category.

Residential Use Categories

1.4.100 Group Living

- A. **Characteristics.** Group Living is characterized by the residential occupancy of a structure by a group of people who do not meet the definition of Household Living. The size of the group will be larger than the average size of a household. Tenancy is arranged on a month-to-month basis, or for a longer period. Uses where tenancy may be arranged for a shorter period are not considered residential. They are considered to be a form of transient lodging (see the Retail Sales and Service and Community Service categories). Generally, Group Living structures have a common eating area for residents. The residents may or may not receive any combination of care, training, or treatment, as long as they also reside at the site. Group Living may include the State definition of residential facility or home (see Chapter 1.3.300, Definitions).
- B. **Accessory Uses.** Accessory uses commonly found are recreational facilities, parking of autos for the occupants and staff, and parking of vehicles for the facility.
- C. **Examples.** Examples include dormitories; fraternities and sororities; monasteries and convents; nursing and convalescent homes; some group homes for the physically disabled, mentally retarded, or emotionally disturbed as defined under ORS 443.400.
- D. **Exceptions.**
 - 1. Lodging where tenancy may be arranged for periods less than one month is considered a hotel or motel use and is classified in the Retail Sales and Service category. However, in certain situations, lodging where tenancy may be arranged for periods less than one month may be classified as a Community Service use such as short term housing.

2. Lodging where the residents meet the definition of Household, and where tenancy is arranged on a month-to-month basis, or for a longer period is classified as Household Living.
3. Facilities for people who are under judicial detainment and are under the supervision of sworn officers are included in the Detention Facilities category.

1.4.110 Household Living

- A. **Characteristics.** Household Living is characterized by the residential occupancy of a dwelling unit by a household. Where units are rented, tenancy is arranged on a month-to-month basis, or for a longer period. Uses where tenancy may be arranged for a shorter period are not considered residential. They are considered to be a form of transient lodging (see the Retail Sales and Service and Community Service categories). Apartment complexes that have accessory services such as food service, dining rooms, and housekeeping are included as Household Living. Single Room Occupancy (SRO) housing, that do not have totally self-contained dwelling units are also included if at least two thirds of the units are rented on a monthly basis. SROs may have a common food preparation area, but meals are prepared individually by the residents.
- B. **Accessory Uses.** Accessory uses commonly found are recreational activities, raising of pets, hobbies, and parking of the occupants' vehicles. Home occupations and accessory dwelling units are accessory uses that are subject to additional regulations.
- C. **Examples.** Uses include living in houses, duplexes, apartments, condominiums, retirement center apartments, manufactured housing, houseboats, and other structures with self-contained dwelling units. Examples also include living in SROs if the provisions are met regarding length of stay and separate meal preparation.
- D. **Exceptions.**
 1. Lodging in a dwelling unit or SRO where less than two thirds of the units are rented on a monthly basis is considered a hotel or motel use and is classified in the Retail Sales and Service category.
 2. SROs that contain programs, which include common dining, are classified as Group Living.
 3. Guest houses that contain kitchen facilities are prohibited as accessory to Household Living uses.
 4. In certain situations, lodging where tenancy may be arranged for periods less than one month may be classified as a Community Service use, such as short term housing or mass shelter.
 5. Bed and breakfast inns and hostels are classified under Bed and Breakfast Inns and Hostels.
